## A MESSAGE TO OUR MEMBERS

We are pleased to inform you of the Association's financial progress during the three months ending March 31, 2023. The financial condition of the Association is sound. The Association remains capitalized to withstand adversity, sufficiently liquid to meet obligations as they come due, and able to earn profits to further enhance total shareholders' equity. This quarterly shareholder report was prepared under the oversight of the Audit Committee.

### *Member Patronage*

The Association, in the form of qualified cash patronage, returned \$31.8 million of its 2022 patronage sourced earnings to patrons in March 2023. This distribution effectively reduced each patron's interest rate in 2022 by approximately three-quarter percent.

### *Financial Highlights*

The Association's first quarter 2023 net earnings were \$25.6 million, which is approximately \$5.2 million higher than the same period in the prior year.

Net interest income before the provision for credit losses increased \$6.5 million during the first quarter compared to the same period last year. The increase was primarily due to increased earnings on our capital, and higher levels of accruing loan volume.

The Association adopted the Financial Accounting Standards Board (FASB) guidance entitled "Measurement of Credit Losses on Financial Instruments" which introduces the current expected credit losses (CECL) methodology to our allowance for credit losses. The standard was implemented on January 1, 2023, and resulted in a \$7.7 million

increase to our capital for the cumulative adjustment upon adoption.

Non-interest income increased approximately \$44 thousand during the first quarter compared to the same period last year.

After the quarterly review of credit risk, the Association did not record a material provision for credit losses in the first quarter 2023, similar to first quarter 2022.

Non-interest expense increased approximately \$1.2 million during the first quarter of which \$0.2 million was an increase in the Farm Credit Insurance Fund premium and \$0.6 million increase in salaries and benefits.

Credit quality decreased to 98.1% Acceptable/OAEM at March 31, 2023 compared to 98.2% at March 31, 2022. Nonaccrual loan volume is \$11.4 million and represents 0.3% of total loan volume. The volume of delinquent accounts, 0.3% of accrual loans and leases, remain low.

The Association advance conditional payment accounts, offering an interest rate of up to 4.15% for the month of March, increased \$32.9 million from \$72.8 million at year-end to \$105.7 million at March 31, 2023.

### *Thank you*

To our Members, we appreciate the confidence you have placed in the Yosemite Farm Credit Team. It is a privilege to serve you. To our prospective Members, we welcome the opportunity to assist with your agricultural financing needs.

Nancy Sill  
Board Chair

Tracy V. Sparks  
President and CEO

Matthew McNelis  
Executive VP and CFO

The Stockholders' investment in the Association is materially affected by the financial condition and the results of operations of CoBank. The CoBank, FCB and CoBank District quarterly and annual reports are available free of charge by accessing CoBank's website, [www.Cobank.com](http://www.Cobank.com), or may be obtained at no charge by contacting us at 806 W. Monte Vista Avenue, P.O. Box 3278, Turlock California, 95381-3278 or by calling (209) 667-2366.

**NOTES TO CONSOLIDATED FINANCIAL STATEMENTS**  
**(Dollars in Thousands, Except as Noted)**  
**(Unaudited)**

**Note 1 – Organization and Significant Accounting Policies**

A description of the organization and operations of Yosemite Farm Credit, ACA, the significant accounting policies followed, and the financial condition and results of operations as of and for the year ended December 31, 2022 are contained in the 2022 Annual Report to Stockholders Annual Report). These unaudited first quarter 2023 financial statements should be read in conjunction with the 2022 Annual Report to Stockholders.

The accompanying unaudited financial statements have been prepared in accordance with accounting principles generally accepted in the U.S. (GAAP) for interim financial information. Accordingly, they do not include all of the disclosures required by GAAP for annual financial statements and should be read in conjunction with the audited financial statements as of and for the year ended December 31, 2022 as contained in the 2022 Annual Report to Stockholders.

In the opinion of management, the unaudited financial information is complete and reflects, all adjustments, consisting of normal recurring adjustments, necessary for a fair statement of results for the interim periods. The preparation of financial statements in accordance with GAAP requires management to make estimates and assumptions that affect the amounts reported in the financial statements and accompanying notes. Actual results could differ from those estimates. The results of operations for interim periods are not necessarily indicative of the results to be expected for the full year ending December 31, 2023. Descriptions of the significant accounting policies are included in the 2022 Annual Report to Stockholders. In the opinion of management, these policies and the presentation of the interim financial condition and results of operations conform with GAAP and prevailing practices within the banking industry.

**Recently Adopted or Issued Accounting Pronouncements**

The institution adopted the Financial Accounting Standards Board (FASB) guidance entitled “Measurement of Credit Losses on Financial Instruments” and other subsequently issued accounting standards updates related to credit losses on January 1, 2023. This guidance replaced the current incurred loss impairment methodology with a single allowance framework for financial assets carried at amortized cost and certain off-balance sheet credit exposures. This guidance requires management to consider in its estimate of the allowance for credit losses (ACL) relevant historical events, current conditions and reasonable and supportable forecasts that affect the collectability of the assets. In addition, the guidance amends existing impairment guidance for held-to-maturity and available-for-sale investments to incorporate an allowance for credit losses related to these securities, which will allow for the reversal of credit impairments in the event that the credit of an issuer improves.

Also adopted effective January 1, 2023, was the updated guidance entitled “Financial Instruments – Credit Losses: Troubled Debt Restructurings and Vintage Disclosure.” This guidance requires the creditor to determine whether a modification results in a new loan or a continuation of an existing loan, among other disclosures specific to modifications with borrowers that are experiencing financial difficulties. The update eliminated the accounting guidance for troubled debt restructurings by creditors. The update also requires disclosure of current period gross write-offs by year of origination for financing receivables and net investments in leases.

The following table presents the impact to the allowance for credit losses and retained earnings upon adoption of this guidance on January 1, 2023:

<u>(in millions)</u>	December 31, 2022	CECL adoption impact	January 1, 2023
<b>Assets:</b>			
Allowance for credit losses on loans	\$ 12,471	\$ (7,068)	\$ 5,403
Allowance for credit losses on investments	-	-	-
Deferred tax assets	-	-	-
<b>Liabilities:</b>			
Allowance for credit losses on unfunded commitments	1,433	(636)	797
Deferred tax liabilities			
<b>Retained earnings:</b>			
Unallocated retained earnings, net of tax	689,018	7,704	696,722

#### Loans and Allowance for Credit Losses

Loans are generally carried at their principal amount outstanding adjusted for charge-offs, deferred loan fees or costs, and valuation adjustments relating to hedging activities. Loan origination fees and direct loan origination costs are netted and capitalized, and the net fee or cost is amortized over the average life of the related loan as an adjustment to interest income. Loan prepayment fees are reported in interest income. Interest on loans is accrued and credited to interest income based on the daily principal amount outstanding.

#### Nonaccrual Loans

Nonaccrual loans are loans for which there is reasonable doubt that all principal and interest will not be collected according to the original contractual terms and are generally considered substandard or doubtful, which is in accordance with the loan rating model, as described below. A loan is considered contractually past due when any principal repayment or interest payment required by the loan instrument is not received on or before the due date. A loan shall remain contractually past due until it is modified or until the entire amount past due, including principal, accrued interest, and penalty interest incurred as the result of past due status, is collected or otherwise discharged in full.

Consistent with prior practice, loans are generally placed in nonaccrual status when principal or interest is delinquent for 90 days (unless adequately secured and in the process of collection), circumstances indicate that collection of principal and interest is in doubt or legal action, including foreclosure or other forms of collateral conveyance, has been initiated to collect the outstanding principal and interest. At the time a loan is placed in nonaccrual status, accrued interest that is considered uncollectible is reversed (if accrued in the current year) or charged against the allowance for loan losses (if accrued in prior years). Loans are charged-off at the time they are determined to be uncollectible.

When loans are in nonaccrual status, interest payments received in cash are generally recognized as interest income if the collectability of the loan principal is fully expected and certain other criteria are met. Otherwise, payments received on nonaccrual loans are applied against the recorded investment in the loan asset. Nonaccrual loans are returned to accrual status if all contractual principal and interest is current, the borrower is fully expected to fulfill the contractual repayments terms and after remaining current as to principal and interest for a sustained period or have a recent repayment pattern demonstrating future repayment capacity to make on-time payments. If previously unrecognized interest income exists at the time the loan is transferred to accrual status, cash received at the time of or subsequent to the transfer should first be recorded as interest income until such time as the recorded balance equals the contractual indebtedness of the borrower.

## Accrued interest receivable

The entity elected to continue classifying accrued interest on loans and investment securities in accrued interest receivable and not as part of loans or investments on the Condensed Statement of Condition. The entity also elected to not estimate an allowance on interest receivable balances because the nonaccrual policies in place provide for the accrual of interest to cease on a timely basis when all contractual amounts are not expected.

## Loan Modifications to Borrowers Experiencing Financial Difficulty

Loan modifications may be granted to borrowers experiencing financial difficulty. Modifications can be in the form of one or a combination of principal forgiveness, interest rate reduction, other-than-insignificant payment delay or a term extension. Covenant waivers and modifications of contingent acceleration clauses are not considered term extensions.

## Collateral dependent loans

Collateral dependent loans are loans secured by collateral, including but not limited to agricultural real estate, crop inventory, equipment, and livestock. CECL requires an entity to measure the expected credit losses based on fair value of the collateral at the reporting date when the entity determines that foreclosure is probable. Additionally, CECL allows a fair value practical expedient as a measurement approach for loans when the repayment is expected to be provided substantially through the operation or sale of the collateral when the borrower is experiencing financial difficulties. Under the practical expedient measurement approach, the expected credit losses are based on the difference between the fair value of the collateral less estimated costs to sell and the amortized cost basis of the loan.

## Allowance for Credit Losses

Beginning January 1, 2023, the allowance for credit losses (ACL) represents the estimated current expected credit losses over the remaining contractual life of financial assets measured at amortized cost and certain off-balance sheet credit exposures. The ACL takes into consideration relevant information about past events, current conditions and reasonable and supportable macroeconomic forecasts of future conditions. The contractual term excludes expected extensions, renewals and modifications unless the extension or renewal options are not unconditionally cancellable. The ACL comprises:

- the allowance for credit losses on loans (ACLL)
- the allowance for unfunded commitments, which is presented on the balance sheet in other liabilities

Determining the appropriateness of the allowance is complex and requires judgment by management about the effect of matters that are inherently uncertain. Subsequent evaluations of the loan portfolio, considering macroeconomic conditions, forecasts and other factors prevailing at the time, may result in significant changes in the ACL in those future periods.

## Methodology for Allowance for Credit Losses on Loans

The ACLL represents management's estimate of credit losses over the remaining expected life of loans. Loans are evaluated on the amortized cost basis, including premiums and discounts.

The entity employs a disciplined process and methodology to establish its ACLL that has two basic components: first, an asset-specific component involving individual loans that do not share risk characteristics with other loans and the measurement of expected credit losses for such individual loans; and second, a pooled component for estimated expected credit losses for pools of loans that share similar risk characteristics.

Asset-specific loans are generally collateral-dependent loans (including those loans for which foreclosure is probable) and nonaccrual loans. For an asset-specific loan, expected credit losses are measured as the difference between the amortized cost basis in the loan and the present value of expected future cash flows discounted at the loan's effective interest rate except that, for collateral-dependent loans, credit loss is measured as the difference between the amortized cost basis in the loan and the fair value of the underlying collateral. The fair value of the collateral is adjusted for the estimated cost to sell if repayment or

satisfaction of a loan is dependent on the sale (rather than only on the operation) of the collateral. In accordance with the entity's appraisal policy, the fair value of collateral-dependent loans is based upon independent third-party appraisals or on collateral valuations prepared by in-house appraisers. When an updated appraisal or collateral valuation is received, management reassesses the need for adjustments to the loan's expected credit loss measurements and, where appropriate, records an adjustment. If the calculated expected credit loss is determined to be permanent, fixed or non-recoverable, the credit loss portion of the loan will be charged off against the allowance for credit losses.

In estimating the component of the ACLL that share common risk characteristics, loans are evaluated collectively and segregated into loan pools considering the risk associated with the specific pool. Relevant risk characteristics include loan type, commodity, credit quality rating or a combination of these classes. The allowance is determined based on a quantitative calculation of the expected life-of-loan loss percentage for each loan category by considering the probability of default, based on the migration of loans from performing to loss by credit quality rating using historical life-of-loan analysis periods for loan types, and the severity of loss, based on the aggregate net lifetime losses incurred per loan pool. The pooled component of the ACLL uses a combination of Association specific and peer historical data to derive expected probability of default and severity of loss rates.

The component of the ACLL also considers factors for each loan pool to adjust for differences between the historical period used to calculate historical default and loss severity rates and expected conditions over the remaining lives of the loans in the portfolio related to:

- lending policies and procedures;
- national, regional and local economic business conditions and developments that affect the collectability of the portfolio, including the condition of various markets;
- the nature of the loan portfolio, including the terms of the loans;
- the experience, ability and depth of the lending management and other relevant staff;
- the volume and severity of past due and adversely classified or graded loans and the volume of nonaccrual loans;
- the quality of the loan review and process;
- the value of underlying collateral for collateral-dependent loans;
- the existence and effect of any concentrations of credit and changes in the level of such concentrations; and
- the effect of external factors such as competition and legal and regulatory requirements on the level of estimated credit losses in the existing portfolio.

The entity uses a single economic scenario over reasonable and supportable forecast period of 12 months. Subsequent to the forecast period, the institution explicitly reverts to long run historical loss experience beyond the 12 months to inform the estimate of losses for the remaining contractual life of the loan portfolio.

The economic forecasts incorporate macroeconomic variables, including unemployment rates, real gross domestic product levels, inflation rates, federal funds rate, export levels and government and consumer spending, as well as agricultural commodity and input prices. The economic forecasts are updated on a quarterly basis.

In addition to the quantitative calculation, the institution considers the imprecision inherent in the process and methodology, emerging risk assessments and other subjective factors, which may lead to a management adjustment to the modeled ACLL results. Expected credit loss estimates also include consideration of expected cash recoveries on loans previously charged-off or expected recoveries on collateral dependent loans where recovery is expected through sale of the collateral.

Prior to January 1, 2023, the allowance for loan losses was maintained at a level considered adequate to provide for probable losses existing in and inherent in the loan portfolio. The allowance was based on a periodic evaluation of the loan portfolio in which numerous factors are considered, including economic conditions, collateral values, borrowers' financial conditions, loan portfolio composition and prior loan loss experience. The allowance for loan losses encompassed various judgments, evaluations and appraisals with respect to the loans and their underlying collateral that, by their nature, contain elements of uncertainty and imprecision. Changes in the agricultural economy and their impact on borrower repayment capacity would cause these various judgments, evaluations and appraisals to change over time. Management considered a number of factors in determining and supporting the levels of the allowances for loan losses, which include, but are not limited to, the concentration of lending in agriculture, combined with uncertainties associated with farmland values, commodity prices, exports, government assistance programs, regional economic effects and weather-related influences.

## Allowance for Credit Losses on Unfunded Commitments

The entity evaluates the need for an allowance for credit losses on unfunded commitments under CECL and, if required, an amount is recognized and included in other liabilities on the Consolidated Statements of Condition. The amount of expected losses is determined by calculating a commitment usage factor over the contractual period for exposures that are not unconditionally cancellable by the institution and applying the loss factors used in the ACLL methodology to the results of the usage calculation. No allowance for credit losses are recorded for commitments that are unconditionally cancellable.

## **Note 2 – Loans and Allowance for Loan Losses**

A summary of loans follows:

	<u>March 31, 2023</u>	<u>December 31, 2022</u>
Real estate mortgage	\$ 2,901,584	\$ 2,925,076
Production and intermediate-term	624,189	719,965
Agribusiness	435,094	426,183
Communication	8,028	9,508
Energy	25,435	20,462
Rural residential real estate	1,583	1,594
Total	<u>\$ 3,995,913</u>	<u>\$ 4,102,788</u>

Prior to the adoption of CECL on January 1 2023, loans were presented with accrued interest receivables.

Accrued interest receivable on loans of \$42.7 million and \$56.4 million at March 31, 2023 and December 31, 2022 have been excluded from the amortized cost of loans and reported separately in the Condensed Combined Statement of Condition. The Association has not written off any accrued interest receivable for the three months ended March 31, 2023 or 2022.

The Association purchases or sells participation interests with other parties in order to diversify risk, manage loan volume and comply with Farm Credit Administration (FCA) regulations. The following table presents information regarding participation purchased and sold at March 31, 2023:

	<u>Participations with Other</u> <u>Farm Credit Institutions</u>		<u>Participations with Non-</u> <u>Farm Credit Institutions</u>		<u>Total Participations</u>	
	<u>Purchased</u>	<u>Sold</u>	<u>Purchased</u>	<u>Sold</u>	<u>Purchased</u>	<u>Sold</u>
Real estate mortgage	\$ 161,349	\$ 304,049	\$ -	\$ -	\$ 161,349	\$ 304,049

Communication	8,028	-	-	-	8,028	-
Energy	25,435	-	-	-	25,435	-
Total	<u>\$ 495,819</u>	<u>\$ 530,461</u>	<u>\$ 6,740</u>	<u>\$ -</u>	<u>\$ 502,559</u>	<u>\$ 530,461</u>

## Credit Quality

Credit risk arises from the potential inability of an obligor to meet its payment obligation and exists in our outstanding loans, letters of credit and unfunded loan commitments. The entity manages credit risk associated with the retail lending activities through an analysis of the credit risk profile of an individual borrower using its own set of underwriting standards and lending policies, approved by its board of directors, which provides direction to its loan officers. The retail credit risk management process begins with an analysis of the borrower's credit history, repayment capacity, financial position and collateral, which includes an analysis of credit scores for smaller loans. Repayment capacity focuses on the borrower's ability to repay the loan based on cash flows from operations or other sources of income, including off-farm income. Real estate mortgage loans must be secured by first liens on the real estate (collateral). As required by Farm Credit Administration regulations, each institution that makes loans on a secured basis must have collateral evaluation policies and procedures. Real estate mortgage loans may

be made only in amounts up to 85% of the original appraised value of the property taken as security or up to 97% of the appraised value if guaranteed by a state, federal, or other governmental agency. The actual loan to appraised value when loans are made is generally lower than the statutory maximum percentage. Loans other than real estate mortgage may be made on a secured or unsecured basis.

The entity uses a two-dimensional risk rating model based on an internally generated combined System risk rating guidance that incorporates a 14-point probability of default rating scale to identify and track the probability of borrower default and a separate scale addressing loss given default. Probability of default is the probability that a borrower will experience a default during the life of the loan. The loss given default is management's estimate as to the anticipated principal loss on a specific loan assuming default occurs during the remaining life of the loan. A default is considered to have occurred if the lender believes the borrower will not be able to pay its obligation in full or the borrower or the loan is classified nonaccrual. This credit risk rating process incorporates objective and subjective criteria to identify inherent strengths, weaknesses and risks in a particular relationship. The institution reviews, at least on an annual basis, or when a credit action is taken the probability of default category.

Each of the probability of default categories carries a distinct percentage of default probability. The probability of default rate between one and nine of the acceptable categories is very narrow and would reflect almost no default to a minimal default percentage. The probability of default rate grows more rapidly as a loan moves from acceptable to other assets especially mentioned and grows significantly as a loan moves to a substandard (viable) level. A substandard (non-viable) rating indicates that the probability of default is almost certain. These categories are defined as follows:

- acceptable — assets are expected to be fully collectible and represent the highest quality,
- other assets especially mentioned (OAEM) — assets are currently collectible but exhibit some potential weakness,
- substandard — assets exhibit some serious weakness in repayment capacity, equity, or collateral pledged on the loan,
- doubtful — assets exhibit similar weaknesses to substandard assets; however, doubtful assets have additional weaknesses in existing facts, conditions and values that make collection in full highly questionable, and
- loss — assets are considered uncollectible.

The following table shows loans under the Farm Credit Administration Uniform Loan Classification System as a percentage of total loans by loan type as of:

	<u>March 31, 2023</u>	<u>December 31, 2022</u>
Real estate mortgage		
Acceptable	95.6%	96.8%
OAEM	2.9	2.2
Substandard	1.5	1.0
Total	<u>100.0%</u>	<u>100.0%</u>
Production and intermediate-term		
Acceptable	94.3%	94.8%
OAEM	1.9	2.1
Substandard	3.4	2.7
Doubtful	0.4	0.4
Total	<u>100.0%</u>	<u>100.0%</u>
Agribusiness		
Acceptable	97.4%	98.5%
OAEM	1.2	0.1
Substandard	1.0	1.0
Doubtful	0.4	0.4
Total	<u>100.0%</u>	<u>100.0%</u>
Communication		
Acceptable	100.0%	100.0%
Total	<u>100.0%</u>	<u>100.0%</u>
Energy		
Acceptable	100.0%	100.0%
Total	<u>100.0%</u>	<u>100.0%</u>
Rural residential real estate		
Acceptable	100.0%	100.0%
Total	<u>100.0%</u>	<u>100.0%</u>
All Loans		
Acceptable	95.6%	96.6%
OAEM	2.5	2.0
Substandard	1.8	1.3
Doubtful	0.1	0.1
Total	<u>100.0%</u>	<u>100.0%</u>

The following table reflects nonperforming assets, which consist of nonaccrual loans and other property owned and related Credit quality statistics:

	<u>March 31, 2023</u>	<u>December 31, 2022</u>
Nonaccrual loans:		
Real estate mortgage	\$ 3,658	\$ 1,325
Production and intermediate-term	6,028	4,608
Agribusiness	<u>1,704</u>	<u>1,704</u>
Total nonaccrual loans	\$ 11,390	\$ 7,637
Accrual loans 90 days or more past due	-	-
Other property owned	-	-
Total nonperforming assets	<u>\$ 11,390</u>	<u>\$ 7,637</u>
Nonaccrual loans as a percentage of total loans	0.28%	0.18%
Nonperforming assets as a percentage of total loans and other property owned	0.28%	0.18%
Nonperforming assets as a percentage of capital	1.6%	1.1%

The following table provides the amortized cost for nonaccrual loans with and without a related allowance for loan losses, as well as, interest income recognized on nonaccrual during the period ending March 31, 2023:

	<u>Amortized Cost with Allowance</u>	<u>Amortized Cost without Allowance</u>	<u>Interest Income Recognized</u>
Nonaccrual loans:			
Real estate mortgage	\$ 2,182	\$ 3,682	\$ -
Production and intermediate-term	-	3,849	-
Agribusiness	<u>1,704</u>	<u>-</u>	<u>-</u>
Total nonaccrual loans	<u>\$ 3,886</u>	<u>\$ 7,531</u>	<u>\$ -</u>

The following tables provide an aging analysis of past due loans at amortized cost by portfolio segment as of:

	30-89 Days Past Due	90 Days or More Past Due	Total Past Due	Not Past Due or less than 30 Days Past Due	Total Loans	Recorded Investment >90 Days and Accruing
<u>March 31, 2023</u>						
Real estate mortgage	\$ 1,066	\$ 5,337	\$ 6,403	\$ 2,895,181	\$ 2,901,584	\$ -
Production and intermediate-term	6,558	5,875	12,433	611,756	624,189	-
Agribusiness	-	1,704	1,704	433,390	435,094	-
Communication	-	-	-	8,028	8,028	-
Energy	-	-	-	25,435	25,435	-
Rural residential real estate	<u>-</u>	<u>-</u>	<u>-</u>	<u>1,583</u>	<u>1,583</u>	<u>-</u>
Total	<u>\$ 7,624</u>	<u>\$ 12,916</u>	<u>\$ 20,540</u>	<u>\$ 3,975,373</u>	<u>\$ 3,995,913</u>	<u>\$ -</u>

Prior to the adoption of CECL, the aging analysis of past due loans reported included accrued interest as follows:

December 31, 2022	30-89 Days Past Due	90 Days or More Past Due	Total Past Due	Not Past Due or less than 30 Days Past Due	Total Loans	Recorded Investment >90 Days and Accruing
Real estate mortgage	\$ 1,816	\$ -	\$ 1,816	\$ 2,969,105	\$ 2,970,921	\$ -
Production and intermediate-term	7,770	837	8,607	718,352	726,959	-
Agribusiness	-	1,704	1,704	427,947	429,651	-
Communication	-	-	-	9,514	9,514	-
Energy	-	-	-	20,549	20,549	-
Rural residential real estate	-	-	-	1,601	1,601	-
Total	<u>\$ 9,586</u>	<u>\$ 2,541</u>	<u>\$ 12,127</u>	<u>\$ 4,147,068</u>	<u>\$ 4,159,195</u>	<u>\$ -</u>

Note: The recorded investment in the loan receivable is the face amount increased or decreased by applicable accrued interest and unamortized premium, discount, finance charges, or acquisition costs and may also reflect a previous direct write-down of the loan receivable.

A loan is considered collateral dependent when the borrower is experiencing financial difficulty and repayment is expected to be provided substantially through the operation or sale of the collateral. The collateral dependent loans are primarily real estate mortgage and rural residential real estate loans.

#### Allowance for Credit Losses

The credit risk rating methodology is a key component of the institution's allowance for credit losses evaluation, and is generally incorporated into the institution's loan underwriting standards and internal lending limits. In addition, borrower and commodity concentration lending and leasing limits have been established by each individual System institution to manage credit exposure. The regulatory limit to a single borrower or lessee is 15% of the institution's lending and leasing limit base but System institutions' boards of directors have generally established more restrictive lending limits. This limit applies to Associations with long-term and short- and intermediate-term lending authorities, and to the Banks' (other than CoBank) loan participations.

Effective January 1, 2023, the System adopted the CECL accounting guidance as described in Note 1. A summary of changes in the allowance for credit losses.

A summary of changes in the allowance for loan losses is as follows (\$ thousands):

Allowance for Loan Losses	Balance at December 31, 2022	Cumulative effect of change in acc principle	Balance at January 1, 2023	Charge-offs and Recoveries Net	Transfers (to) from Reserve for Unfunded Commitments	Provision for loan losses (loan loss reversal)	Balance at March 31, 2023
Real estate mortgage	\$ 4,859	\$ (4,130)	\$ 729	\$ -	\$ 11	\$ 9	\$ 749
Production and intermediate-term	4,804	(2,116)	2,688	-	(44)	107	2,751
Agribusiness	2,745	(826)	1,919	-	15	-	1,934
Communication	19	23	42	-	2	(20)	24
Energy	43	(19)	24	-	2	4	30
Rural residential real estate	1	-	1	-	-	-	1
Total	\$ 12,471	\$ (7,068)	\$ 5,403	\$ -	\$ (14)	\$ 100	\$ 5,489

Allowance for Unfunded Commitment	Balance at December 31, 2022	Cumulative effect of change in acc principle	Balance at January 1, 2023	Transfers from (to) Allowance for Loan Losses	Balance at March 31, 2023	Total allowance for credit losses
Real estate mortgage	\$ 215	\$ (120)	\$ 95	\$ (11)	\$ 84	\$ 833
Production and intermediate-term	802	(220)	582	44	626	3,377
Agribusiness	394	(313)	81	(15)	66	2,000
Communication	8	23	31	(2)	29	53
Energy	14	(6)	8	(2)	6	36
Rural residential real estate	-	-	-	-	-	1
<b>Total</b>	<b>\$ 1,433</b>	<b>\$ (636)</b>	<b>\$ 797</b>	<b>\$ 14</b>	<b>\$ 811</b>	<b>\$ 6,300</b>

Allowance for Loan Losses <sup>1</sup>	Balance at December 31, 2021	Charge-offs	Recoveries	Transfers (to) from Reserve for Unfunded Commitments	Provision for Loan Losses/(loan loss reversals)	Balance at March 31, 2022
Real estate mortgage	\$ 4,597	\$ -	\$ -	\$ 35	\$ (276)	\$ 4,356
Production and intermediate-term	3,033	-	-	(121)	313	3,225
Agribusiness	2,775	-	-	71	(24)	2,822
Communication	13	-	-	1	(1)	13
Energy	45	-	-	(4)	(2)	39
Rural residential real estate	1	-	-	-	-	1
<b>Total</b>	<b>\$ 10,464</b>	<b>\$ -</b>	<b>\$ -</b>	<b>\$ (18)</b>	<b>\$ 10</b>	<b>\$ 10,456</b>

<sup>1</sup> For periods prior to January 1, 2023, the allowance for loan losses was based on probable and estimable losses inherent in the loan portfolio

The Association did not have any loan modifications granted to borrowers experiencing financial difficulty during quarter ending March 31, 2023.

#### Troubled Debt Restructurings

Prior to January 1, 2023, the adoption of updated FASB guidance on loan modifications, a restructuring of a loan constituted a troubled debt restructuring, also known as formally restructured, if the creditor for economic or legal reasons related to the borrower's financial difficulties granted a concession to the borrower that it would not otherwise consider. Concessions varied by program and were borrower-specific and could include interest rate reductions, term extensions, payment deferrals or the acceptance of additional collateral in lieu of payments. In limited circumstances, principal may have been forgiven. When a restructured loan constituted a troubled debt restructuring, these loans were included within our impaired loans under nonaccrual or accruing restructured loans. The Association did not have any troubled debt restructurings for the quarter ending March 31, 2023 or within the previous 12 months.

### Note 3 – Capital

The following sets forth the regulatory capital ratio requirements and ratios at March 31, 2023:

<u>Ratios</u>	<u>Ratios as of March 31, 2023</u>	<u>Minimum with Buffer*</u>	<u>Minimum Requirement</u>
Common Equity Tier 1 Capital	14.11%	7.0%	4.5%
Tier 1 Capital	14.11%	8.5%	6.0%
Total Capital	14.26%	10.5%	8.0%
Tier 1 Leverage**	14.73%	5.0%	4.0%
Unallocated Retained Earnings (URE) and URE Equivalents Leverage	14.68%	1.5%	1.5%
Permanent Capital	14.13%	7.0%	7.0%

If the capital ratios fall below the total requirements, including the buffer amounts, capital distributions (equity redemptions, dividends and patronage) and discretionary senior executive bonuses are restricted or prohibited without prior FCA approval.

An existing regulation empowers FCA to direct a transfer of funds or equities by one or more System institutions to another System institution under specified circumstances. This regulation has not been utilized to date. The Association has not been called upon to initiate any transfers and is not aware of any proposed action under this regulation.

### Note 4 – Fair Value Measurements

Accounting guidance defines fair value as the exchange price that would be received for an asset or paid to transfer a liability in an orderly transaction between market participants in the principal or most advantageous market for the asset or liability. The fair value measurement is not an indication of liquidity. See Note 15 to the 2022 Annual Report to Stockholders for a more complete description. There are no assets or liabilities measured at fair value on a recurring basis at March 31, 2023. Assets and liabilities measured at fair value on a non-recurring basis are summarized below.

<u>March 31, 2023</u>	<u>Total Fair Value Level 3</u>	<u>Total Gains (Losses)</u>
Assets:		
Impaired loans	\$ 468	\$ (3,418)
<u>December 31, 2022</u>	<u>Total Fair Value Level 3</u>	<u>Total Gains (Losses)</u>
Assets:		
Impaired loans	\$ 1,430	\$ (3,224)

With regard to nonrecurring measurements for impaired loans, it is not practicable to provide specific information on inputs as each collateral property is unique. The Association utilizes appraisals to value these loans and take into account unobservable inputs such as, income and expense, comparable sales, replacement cost and comparability adjustments.

## **Valuation Techniques**

As more fully discussed in Note 15 of the 2022 Annual Report to Stockholders, the FASB guidance establishes a fair value hierarchy, which requires an entity to maximize the use of observable inputs and minimize the use of unobservable inputs when measuring fair value. The following represent a brief summary of the valuation techniques used for the Bank and its related Associations' assets and liabilities. For a more complete description, see Notes to the 2022 Annual Report to Stockholders.

***Loans Evaluated for Impairment:*** For certain loans evaluated for impairment under FASB impairment guidance, the fair value is based upon the underlying collateral since the loans are collateral-dependent loans for which real estate is the collateral. The fair value measurement process uses independent appraisals and other market-based information, but in many cases it also requires significant input based on management's knowledge of and judgment about current market conditions, specific issues relating to the collateral and other matters. As a result, a majority of these loans have fair value measurements that fall within Level 3 of the fair value hierarchy. When the value of the real estate, less estimated costs to sell, is less than the principal balance of the loan, a specific reserve is established.

## **Note 5 – Subsequent Events**

The Association has evaluated subsequent events through May 3, 2023, which is the date the financial statements were issued, and no material subsequent events were identified.
